

Napa County Winegrape Growers:

It has come to our attention that the organic herbicide Weed Slayer, Agro Research International, is under investigation by the California Department of Food and Agriculture and the California Department of Pesticide Regulation for possible product contamination. If you have any product in storage, we recommend that conventional and especially organically certified growers do not apply the herbicide pending results from the ongoing investigations. If you have any questions, please contact the Napa County Ag Commissioner's Office at agcommissioner@countyofnapa.org or (707)253-4357.
